URGENT: Precautions Regarding Product Downloads/License Keys from Sage

November 22, 2016

To All Steward Consulting Clients:

Sage issues emails to current Business Care customers announcing new Product Downloads, along with new Product Unlocking Keys. You may also see a pop-up when you are in your Sage 100 system asking you to download the latest product updates.

As with all product releases sent from Sage, we strongly urge you to NOT download software direct to your Sage 100 system. Doing so without technical assistance and/or a complete understanding of the new version and the changes it contains could damage your Sage 100 data files and, in some cases, prevents you from using all or parts of your software altogether. In some situations it can also cause damage to your Enhancements and/or Third-party software.

If you have additional questions, please contact dconner@stewardconsulting.com OR support@stewardconsulting.com.

To be placed in queue for installation of Product Downloads or License Keys upon their release, please contact dconner@stewardconsulting.com.

Sincerely,

Darin Steward, CPA
CEO
